

**WOULD YOU LIKE TO LEARN MORE ABOUT ENVIRONMENTAL CLEANUP PROJECTS
AT THE DAVIDSONVILLE FUEL OIL SPILL SITE?**

If yes, then please contact Katrina Harris, Bridge Consulting, at kharris@bridgeconsultingcorp.com or 610.494.8044 to get more information on possibly participating in the startup of a Restoration Advisory Board, also known as a “RAB”. We are also interested in any concerns or preferred communication methods as we update our Community Involvement Plans.

- What is a RAB?
 - A RAB is a community group which meets to discuss and receive information on environmental restoration (cleanup) projects at a military base.
- What does a RAB do?
 - A RAB facilitates and improves communication, outreach, and transparency between the military base, the public, regulators, local governments, and interest groups for issues related to military cleanup activities. RABs offer a structured, focused, and interactive opportunity for community stakeholders to meaningfully participate in the cleanup process. A RAB enables local community members to receive from and exchange information with the base and regulatory agencies managing environmental cleanup projects at the Davidsonville Fuel Oil Spill Site.
 - RABs engage in and support DoD’s cleanup efforts by reviewing and commenting on cleanup documents and activities; serving as a liaison to and sharing cleanup information with the community; and providing a forum to exchange information about the schedule, type, and status of cleanup activities. RAB meetings allow RAB members and members of the community to receive updates and ask questions on the status of the environmental cleanup program at the Davidsonville Fuel Oil Spill Site.
 - Though RABs are not a decision-making body, they do give local community members the opportunity to have their voices heard and provide a forum to provide valuable community insight to base and regulatory agencies.
- Are you interested in participating in a RAB for the Davidsonville Fuel Oil Spill Site?
 - Joint Base Andrews is currently assessing whether there is enough community interest to establish a RAB for this site.
 - If you are interested in learning more about the environmental restoration projects at the Davidsonville Fuel Oil Spill Site, and having the opportunity to give your input to base and regulatory agencies on the management of cleanup projects at the Davidsonville Fuel Oil Spill site, either as a RAB member or by attending RAB meetings, please contact Katrina Harris, Bridge Consulting at kharris@bridgeconsultingcorp.com or 610.494.8044 by August 31, 2025 to indicate interest.
