January 17, 2018

Mr. Andrew Sochanski  
US Environmental Protection Agency  
1650 Arch Street (3HS11)  
Philadelphia, PA 19103

Dear Mr. Sochanski,

This statement is provided pursuant to Section IX of the Joint Base Andrews 2011 Federal Facility Agreement (FFA), subsections 9.2.5 and 9.2.7, and pertains to site CS503 (CS-C503), The PCB-Contaminated Sediment in Retention Pond at Joint Base Andrews.

The Phase I Remedial Investigation Report for CS-C503 (finalized in December 2013) concluded that the site presented no unacceptable risk under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). Therefore, no action is warranted, and no feasibility study (FS) is required. This statement fulfills the requirement for a "concise FS statement" in subsection 9.2.5 of the FFA and the requirement to "report upon a FS" in subsection 9.2.7 of the FFA.

In accordance with subsection 9.2.5 of the FFA, a no-action proposed plan will be included in the 2018 annual amendment to the FFA Site Management Plan for Joint Base Andrews. After the required public and regulator comments on the proposed plan, the Air Force shall prepare a no-action record of decision in accordance with subsection 9.4 of the FFA.

If you have any questions regarding this letter or any other matters related to the JBA Environmental Restoration Program, please do not hesitate to contact me at (301) 981-1653 or david.m.connolly8.civ@mail.mil, or by mail at Air Force Civil Engineer Center (AFCEC/CZOE), 1602 California Ave, Suite 239, Joint Base Andrews, MD 20762.

Sincerely,

DAVID M. CONNOLLY, REM <sup>17 Jan 18</sup>  
Restoration Program Manager  
Joint Base Andrews, MD
